

## VEDANT SWING - COMPLETE USER GUIDE

<https://vedant-swing-web.onrender.com> | Nifty 500 Swing Trading | All app options below

### QUICK START (PHONE)

1. Open the URL in Chrome (Android) or Safari (iPhone)
2. Menu -> "Add to Home screen" - use like a mobile app
3. First open after idle may take 30-60 sec (free cloud tier wakes up)
4. Tap Refresh (refresh) if data looks old

### TOP BAR (ALWAYS VISIBLE)

VEDANT SWING - App name

Refresh Refresh - Reloads market mood, evening scan, watchlist, paper portfolio, journal, and alerts

Subtitle line - Shows: Watchlist count - Active alerts - Time (IST)

Market pill (green/ - Nifty market mood for last 20 trading days  
red/amber) Examples: "Nifty BULLISH - 20d +3.98%"

BULLISH = index trending up

BEARISH = index trending down

NEUTRAL = sideways / mixed

### 5 TABS:

Home - Search stocks, charts, evening scan, position tracker

Watch - Your personal stock watchlist

Paper - Virtual Rs.5,00,000 practice trading (no real money)

Journal - Plan and track your real trade ideas + R:R

Alerts - Price above/below notifications

### TAB 1 - HOME

#### SEARCH STOCK

Symbol box - Type NSE symbol (e.g. TITAN, RELIANCE, M&M)

Analyze button - Runs technical analysis on that stock

Quick chips - One-tap analyze: TITAN, RELIANCE, TCS,

HDFCBANK, INFY, BAJFINANCE

PRICE CHART (appears after Analyze)

Shows candlestick chart + volume + EMA lines (like Google Finance)

Price block (top right):

Last price - Current / latest close

Change line - Green = up, Red = down (for selected period)

TIMEFRAME BUTTONS - Tap to change chart period:

1D - Today, 5-minute candles (intraday)

5D - Last 5 days, 15-minute candles

1M - 1 month, daily candles

3M - 3 months, daily

6M - 6 months, daily (default)

1Y - 1 year, daily

5Y - 5 years, weekly candles

MAX - Full available history, weekly

STATS ROW (updates when you change timeframe):

Open - First price in that period

High - Highest price in period (green)

Low - Lowest price in period (red)

Close - Latest price

Volume - Total shares traded (K = thousands, L = lakhs, Cr = crore)

RSI - Relative Strength Index (below 30 oversold, above 70 overbought)

Chart lines:

Green/red candles - Price up / down per bar

Volume bars - Trading activity under price

Purple EMA9 - Short trend (intraday / short periods)

Blue EMA21 - Medium trend

Orange EMA50 - Longer trend

ANALYSIS RESULT (below chart)

Symbol + index tag - Stock name + Nifty 50 / Next 50 / Nifty 500

Signal badge - See "SIGNAL MEANINGS" section below

Score bar 0-100 - Higher = stronger swing setup

Price - Live / latest price

Target +3% - Suggested swing profit target (+3% from entry)

RSI - Momentum indicator

Trend - up / down / sideways

EMA21 / EMA50 - Moving average levels

Signals list - Why the app scored this stock

ACTION BUTTONS:

Cash - Remaining virtual money

Open - Number of open paper positions

Position rows - Symbol, qty, entry price

Sell button - Enter exit price -> shows profit/loss

Closed list - Last 5 closed trades with P&L

Paper Buy form:

Symbol - NSE ticker

Qty - Number of shares

Entry - Buy price

Stop - Optional stop-loss level (for your reference)

Target - Optional target (for your reference)

Place buy - Execute virtual buy

### RULES:

- Cannot buy same stock twice - sell first, then buy again

- Insufficient cash = buy rejected with red message

- Paper Buy on Home tab = one-tap buy from analysis

TAB 4 - JOURNAL (TRADE PLANNING)

Purpose: Record your trade plan BEFORE you enter - discipline tool

New Trade Plan form:

Symbol - Stock name

Entry - Planned buy price

Stop - Stop-loss price (max loss level)

Target - Profit target price

Qty - Optional share count

Strategy - Optional note (e.g. "Pullback 21 EMA")

Save plan - Saves with auto R:R calculation

R:R preview - Risk:Reward ratio (e.g. 2.5:1 means target gain is 2.5x bigger than stop loss)

Journal list:

Open entries - Trades still active -> tap Close -> enter exit price

Closed entries - Completed trades with final P&L %

Also fill from Home: Analyze -> tap "Journal" button

TAB 5 - ALERTS (PRICE ALERTS)

Purpose: Get notified when price crosses your level

Create alert form:

Symbol - Stock to watch

Price above/below - Trigger when price goes above OR below level

Price level - Your trigger price (e.g. 3200)

Note - Optional reminder text

Create alert - Saves alert

Check alerts now - Manually check all alerts against live prices

(also auto-checked every 30 min on cloud)

Active Alerts - List of waiting alerts - Delete to remove

Alert History - Past triggers with time and message

Also create from Home: Analyze -> "+ Alert" (pre-fills symbol & target)

SIGNAL MEANINGS (ANALYSIS BADGE)

STRONG BUY - High score, multiple bullish signals aligned

BUY - Good swing setup, meets strategy rules

WATCH - Interesting but not full entry yet - wait

SETUP - Pattern forming (evening scan)

AVOID - Weak setup or against trend - skip

Swing score 0-100:

70+ - Strong candidate

62-69 - Acceptable (app minimum for research picks)

Below 62 - Usually filtered out of scans

3 SWING STRATEGIES (EVENING SCAN)

1. PULLBACK 21 EMA

Stock in uptrend pulls back near 21-day moving average.

RSI 40-55. Good for buying the dip in a strong stock.

2. BREAKOUT

Price breaks above 10-day consolidation range with volume.

Good for momentum entries after a tight base.

3. OVERSOLD BOUNCE

RSI oversold but stock still above long-term trend.

Good for quick bounce trades (higher risk).

+ Watchlist - Add stock to Watch tab (track later)  
+ Alert - Jump to Alerts tab with symbol pre-filled  
Paper Buy - Instantly paper-buy with suggested qty/price  
Green toast = success  
Red toast = error (e.g. already holding stock)  
Journal - Jump to Journal tab with entry/stop/target filled  
**EVENING SWING SCAN**  
Auto-runs at 3:45 PM IST on trading days (cloud automation)  
Scans all Nifty 500 stocks for swing setups  
Run now - Manually trigger scan (takes a few minutes)  
Meta line - Date - number of setups found - stocks scanned  
Strategy filter chips:  
All - Every setup found  
Pullback 21 EMA - Stock pulled back to 21-day average in uptrend  
Breakout - Price breaking out of tight range with volume  
Oversold Bounce - RSI low, possible bounce in uptrend  
Tap any stock row - Opens full analysis on Home tab  
**POSITION TRACKER**  
Shows your ONE real tracked position (if synced from cloud bot)  
Displays: symbol, qty, average price, P&L %, sell/average signals  
Record Average - Log that you bought more at lower price  
Record Sell - Close the tracked position  
(Empty = no open position - use Paper tab for practice instead)  
**TAB 2 - WATCH (WATCHLIST)**  
Purpose: Keep a personal list of stocks to monitor  
Add symbol + Add - Type symbol and add to list  
Tap stock row - Analyze that stock on Home tab  
Remove - Delete from watchlist  
Also add from Home: Analyze stock -> tap "+ Watchlist"  
**TAB 3 - PAPER (PAPER TRADING)**  
Purpose: Practice with Rs.5,00,000 virtual money - NO real broker  
Paper Portfolio:

**RECOMMENDED DAILY ROUTINE (IST)**  
9:00 AM - Morning research runs automatically on cloud  
9:15 AM - Open app -> check Alerts tab  
10:00 AM - Review any WATCHLIST stocks with Analyze  
3:45 PM - Evening Nifty 500 scan runs automatically  
4:00 PM - Home tab -> review Evening Swing Scan setups  
4:30 PM - Shortlist -> Watchlist -> Paper trade or Journal plan  
Any time - Use chart timeframes (1D-MAX) before deciding  
**TOAST MESSAGES (BOTTOM POPUP)**  
Green - Success (buy done, added to watchlist, etc.)  
Red - Error (duplicate buy, insufficient cash, network)  
Grey - Info (scan running, loading)  
**WHAT IS NOT IN MVP (YET)**  
X Real broker buy/sell (Angel One - Phase 2)  
X Email alerts (optional - see SETUP\_GMAIL\_ALERTS.txt)  
X Telegram (optional - add secrets in GitHub)  
X Guaranteed NSE live tick-by-tick (uses Yahoo + NSE with fallback)  
**TIPS**  
- Use symbols exactly as NSE lists them (M&M not MM)  
- Paper trading = learning only, not connected to your demat  
- Journal = your discipline log, separate from paper portfolio  
- One paper position per symbol - mirrors real trading discipline  
- Evening scan on free tier: first "Run now" may be slow  
- Not SEBI-registered advice - all signals are for research only  
**SUPPORT FILES (IN PROJECT FOLDER)**  
USER-GUIDE.txt - This file  
PROJECT-INFO.txt - Technical feature list  
SETUP\_GMAIL\_ALERTS.txt - Enable email on every report  
README.md - Developer / deploy info  
**DISCLAIMER:** Vedant Swing is a personal research tool. Not financial advice. Not SEBI registered. Trade at your own risk.
