

Vedant Swing

Practical User Guide - Nifty 500 Swing Trading App

<https://vedant-swing-web.onrender.com>

MARKET

India NSE

UNIVERSE

Nifty 500

STYLE

Swing (3-7 days)

PAPER CASH

Rs. 5,00,000

This report explains every screen, button, and workflow in the Vedant Swing mobile web app. Use it as your daily reference for research, paper trading, and trade planning.

Quick Start

Get the app on your phone in 2 minutes

1. Open <https://vedant-swing-web.onrender.com> in Chrome or Safari
2. Tap menu -> "Add to Home screen" (works like a real app)
3. First load after idle may take 30-60 seconds (cloud wake-up)
4. Tap Refresh (top-right) if numbers look stale

Top Bar - Always Visible

Element	What it does
Refresh	Reloads market mood, scans, watchlist, paper, journal, alerts
Subtitle	Watchlist count Active alerts Current time (IST)
Market pill	Nifty BULLISH / BEARISH / NEUTRAL + 20-day % change

App Tabs Overview

Tab	Purpose	Main actions
Home	Research hub	Search, chart, analyze, evening scan
Watch	Track favourites	Add/remove symbols, tap to analyze
Paper	Practice trades	Virtual Rs.5L portfolio, buy/sell
Journal	Trade discipline	Plan entry/stop/target, log R:R
Alerts	Price triggers	Above/below alerts, history

Home Tab

Your main research and decision screen

Search Stock

- Symbol box: type NSE ticker (TITAN, RELIANCE, M&M)
- Analyze: runs full technical scoring
- Quick chips: one-tap analyze for popular stocks

Price Chart (Google Finance style)

Button	Period shown	Candle type
1D	Today	5-minute
5D	Last 5 days	15-minute
1M	1 month	Daily
3M	3 months	Daily
6M	6 months (default)	Daily
1Y	1 year	Daily
5Y	5 years	Weekly
MAX	Full history	Weekly

Stat	Meaning
Open / High / Low / Close	Price range for selected period
Volume	K=thousands, L=lakhs, Cr=crore shares
RSI	Below 30 oversold Above 70 overbought
EMA lines	Purple=9 Blue=21 Orange=50 day trend

Analysis Result Card

Field / Button	Action
Signal badge	STRONG BUY / BUY / WATCH / AVOID
Score 0-100	Higher = stronger swing setup
Target +3%	Suggested profit level for swing
+ Watchlist	Save stock to Watch tab
+ Alert	Pre-fill price alert form
Paper Buy	One-tap virtual buy (green=OK, red=error)
Journal	Pre-fill trade plan form

Evening Swing Scan

- Auto-runs 3:45 PM IST on trading days (Nifty 500 scan)
- Run now: manual scan when you want fresh setups
- Filters: All | Pullback 21 EMA | Breakout | Oversold Bounce
- Tap any row to open full stock analysis

Position Tracker

Shows one real tracked position if synced from cloud. Record Average / Record Sell logs your live trade. Empty? Use Paper tab for practice instead.

Watch Tab

Personal shortlist of stocks to monitor

- Add symbol + Add button to build your list
- Tap any stock to analyze on Home tab
- Remove deletes from watchlist
- Shortcut: Analyze stock -> + Watchlist on Home

Paper Tab

Virtual trading - Rs. 5,00,000 starting cash

Item	Details
Cash	Remaining virtual money
Open positions	Stocks you hold in paper mode
Sell	Enter exit price -> shows profit/loss
Place buy	Manual buy with symbol, qty, entry, stop, target

Important

One stock = one position only. Sell first before buying the same symbol again. Paper trading is NOT connected to your demat account.

Journal Tab

Plan trades before you enter - build discipline

Field	Purpose
Entry	Planned buy price
Stop	Maximum loss exit price
Target	Profit exit price
R:R preview	Risk-reward ratio (aim for 2:1 or better)
Close	Mark trade finished with actual exit price

Alerts Tab

Know when price hits your level

- Price above: alert when stock crosses level upward
- Price below: alert when stock falls under level
- Check alerts now: manual trigger (auto every 30 min on cloud)
- Alert History: see past triggered alerts

Signal Reference

How to read analysis badges

Signal	Meaning	Action
STRONG BUY	Best setups - multiple signals align	Priority review
BUY	Good swing entry	Consider for watchlist/paper
WATCH	Not ready yet	Wait for better entry
AVOID	Weak or against trend	Skip

Swing Score Guide

Score	Quality
70+	Strong candidate
62-69	Acceptable (scan minimum)
Below 62	Usually filtered out

3 Evening Scan Strategies

Strategy	When to use	Idea
Pullback 21 EMA	Uptrend dip	Buy near 21-day average, RSI 40-55
Breakout	Momentum	Price breaks tight range with volume
Oversold Bounce	Quick bounce	RSI low but trend still up (higher risk)

Daily Routine (IST)

Suggested workflow - no laptop needed

Time	Action
9:00 AM	Morning research runs on cloud automatically
9:15 AM	Open app -> check Alerts tab
10:00 AM	Analyze watchlist stocks, check chart timeframes
3:45 PM	Evening Nifty 500 scan runs automatically
4:00 PM	Review Evening Scan on Home tab
4:30 PM	Shortlist -> Watchlist -> Paper or Journal

Toast Messages

Bottom popup feedback

Color	Meaning	Examples
Green	Success	Bought 10 TCS, added to watchlist
Red	Error	Already holding stock, insufficient cash
Grey	Info	Scan running, loading data
